ABOUT THE CONFERENCE

The conference is an attempt to reflect on the phenomenon of Applied Ethics in a comprehensive and interdisciplinary/ multidisciplinary manner, to provide unlimited resources to create a global network which will deepen the dialogue between empirical research, theoretical conceptualizations and public discourses on social dilemmas in the pursuit of a nuanced and empirically sensitive conception of a good society from moral, medical and legal perspectives.

All the situations in our life forms, whether social or personal, are triggered or are licensed from our moral acceptance, medical conditions and their availability of aids, and our decisions often require legal sanctions directing towards the legitimacy of those actions; hence the need of such a discourse in a formal setup becomes vital.

The conference is aiming on the recognition of intercultural, multi-layered and multi-leveled phenomena which need a wide range of perspectives to be brought to bear if we are to grapple with what they are, how we are to understand them and more importantly, the consequences they have for human living, thinking and sustainability.
